CONNECTING MOBILE LIFESTYLES™

## SAFESURF™

Making even public networks secure and safe to use

### **BROWSE THE WEB SECURELY WHEN USING UNSECURED NETWORKS**

Due to the increasing danger of cybersecurity, WiFiRanger has developed SafeSurf™ to protect against malicious intrusion, even when using public networks. The vast majority of mobile internet users are highly concerned with security, and will even go to the extent of never using public WiFi due to the fear of identity theft, credit card fraud, or personal information being stolen. SafeSurf™ is designed specifically for this purpose, keeping mobile internet users secure while doing their online banking, shopping, and browsing.

The feature is unique to WiFiRanger, and is easily enabled with the single click of a button on the WiFiRanger Control Panel interface. Once enabled, SafeSurf™ utilizes advanced VPN technology with Standard Blowfish Encryption to securely transport information.

### SPECIFICATIONS

TECHNOLOGY TYPE	VIRTUAL PRIVATE NETWORK (VPN)
ENCRYPTION	STANDARD BLOWFISH ENCRYPTION
EASE OF USE	ONE-CLICK SETUP
COMPATIBILITY	WORKS ON ANY NETWORK
